Student's Name:_____

Date:_____

Patterns

In this assignment you will learn how to create patterns and tessellate shapes so that they all fit within a certain space. Using the site:

http://ejad.best.vwh.net/java/patterns/patterns_j.shtml

create a patterned design with different shapes that will fill the whole space. On this worksheet use words, and plain English to describe what the pattern is. In your description you should include the correct name of the polygon, and the color that you are using along with specific about the position and rotation.

Once you have finished your pattern use the "instructions to print out" to print your pattern and attach it to the back of this page.

Description of your pattern:

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____
